The inaugural

REPLACEMENT HEIFER CALF SPECIAL

THURSDAY, JAN. 25, 2024 • NOON, MST
STOCKMEN'S LIVESTOCK, DICKINSON, ND

250+

Replacement Quality
HEIFER CALVES from our customers

BUILDING DEMAND FOR YOUR HEIFERS

We are proud of the herds our customers are developing with Strommen Ranch, Talkington Angus and Best Angus genetics and that is why **we strive to help our customers capture additional value for their females** through the Badlands Angus Alliance, where our collective customers have marketed more than 2,500 bred females since 2018. Many of those heifers have commanded a \$200 to \$500 per head premium over other bred heifer sales in the region!

The Badlands Angus Alliance continues to be the **premier sale in Western North Dakota for source and genetic verified Angus replacement females**. It demonstrates the strong demand we've helped build for genetically sourced cattle of maternal pedigree.

The Badlands Angus Alliance Group is excited for the Inaugural Replacement Heifer Calf special. This sale will feature multiple groups of reputation heifers that carry the genetics of Talkington, Best and Strommen.

We, along with the staff at Stockmen's Livestock in Dickinson, are excited about this new venture and are committed to making this not only a premier event to showcase our bull customers' replacement heifers, but also provide an opportunity for those looking to acquire high quality genetics with a known maternal background to either expand your herd or procure for a heifer development program.

Heifer calves sold through this sale directly qualify for the 2024 Badlands Angus Bull and Bred Female sale when they are bred back to Talkington, Best or Strommen Ranch Angus calving-ease bulls! This sale is yet another way we are working to add value to our customers' operations.

These heifers will be on site at Stockmen's Livestock Exchange in Dickinson, N.D., presorted for quality, weighed and sold with an accurate weight, checked open and breedable and bangs vaccinated with a full health and mineral program behind them. Buy with confidence from reputable operations with a program and profit-minded genetics behind them for generations.

The genetics run deep in this set of reputation heifer calves. For the past 30 years, the Meyer's have implemented an extensive AI program in not only their heifers, but also in their mature cow herd. This specific set of heifer calves are either AI sired by, or sired by sons of Rainfall, Roughrider, Cowboy Up, Motive, and Resource. The cow herd behind these heifers is heavily influenced by bulls such as Mustang, Grid Maker, BAR EXT, Predestined, and 616. The Meyer's cowherd is truly impressive to go through. Their cows are high-volume, easy-fleshing females, that wean heavy calves without a lot of extra inputs.

They have had a full scope of vaccinations both spring and fall including Bovi-Shield Gold One Shot, Vision 7 20/20 and Vision 7 Somnus, Endovac Beef. They were de-wormed with Valbazen and poured. They've been bangs vaccinated and preg-checked open and breedable.

Prairie Diamond Ranch has a long tradition of raising sought after females and top-quality feeder cattle that consistently top the market. Prairie Diamond has a reputation for buying top end bulls and have AI'd their heifers and cows for decades. Every breeding decision that is made, and bull purchased is well thought out, they do their homework on genetics. As good of a herd of cows as you will find backs these heifers, this highly maternal set of cows is loaded with capacity and fleshing ability, and they bring in a big set of calves every fall. Some of the more recent genetics that would heavily influence this set of heifers would be Rainfall, Charlo, and Resource.

They have had a full scope of vaccinations both spring and fall including One Shot BVD, Inforce 3, Bovi-Shield Gold One Shot, Vision 7 Somnus, Express 5HS. They were de-wormed with Dectomax Injectable and poured with Clean-Up II. They've been bangs vaccinated and preg-checked open and breedable.

CHRIS PALMER, ZAP, ND

54 ANGUS REPLACEMENT HEIFER CALVES

Contact: **CHRIS PALMER • 701-870-2048**

We are excited to have this consignment of replacement heifer calves from Chris Palmer. These heifers are all sired by Strommen Ranch sons of Bruin Torque. Chris is very intentional when he buys bulls knowing he wants to market high-end replacement heifers. The mothers to these heifers would have been home raised or purchased from Scott Woroneicki as the premium, top cut from his heifer development program. The brothers to this group topped the market at Stockmen's Livestock when they sold in December. These heifers will be the very top cut of 150 head with nothing held back.

They have had a full scope of vaccinations both spring and fall including Bovi-Shield Gold One Shot and Ultrabac 7, plus Ivermectin pour on and Valcor injectable dewormer in October. These heifers were poured with Ivermectin, were Bangs vaccinated, preg checked open and breedable, by New Salem Vet Clinic on January 2nd. Buy with confidence here from good cattlemen and a program behind them.

BRUIN TORQUE S261

CHRIS KLYM, DUNN CENTER, ND

35 ANGUS REPLACEMENT HEIFER CALVES

Contact: **CHRIS KLYM • (701) 590-8737**

This set of heifers that Chris is bringing to the Badlands Angus Alliance Replacement Heifer Calf Special are out of a group of cows he bought from the David Rodakowski dispersion. Chris is not holding any heifers back from this set of cows, so this will be the top cut. Dave Rodakowski is a long-time Talkington customer, who always buys bulls out of the very front end of the sale. His cows run in rugged Badlands pastures and are not pampered. The bulls that Dave has tied into heavily over the last few years that would heavily influence these heifers are sons of Versatile, Revival, Tahoe, Bravo, Rainfall, and Renovation.

They have had a full scope of vaccinations both spring and fall including Bovi-Shield Gold One Shot, Vision 7 Somnus and were de-wormed with Dectomax Injectable. They've been bangs vaccinated and preg-checked open and breedable.

BEST *Angus* CALVING-EASE BULLS

FOR YOUR NEXT HEIFER PROJECT!

Angus Alliance Winchester 975 - Reg# 16533253

After using Winchester for a season and being thoroughly impressed, we purchased a semen interest in Winchester. We have used him mainly for breeding heifers for the past five years. The calves come easy with excellent vigor. He has a classic pedigree combining maybe the greatest female producer in the history of the Angus breed in N Bar Emulation EXT and Coleman Donna 386, the matriarch of the Coleman program. The daughters are what you would expect. They are attractive wedge-shaped females with strong udder attachments and perfect teat size. His EPD profile has held strong even though he has more of a historic pedigree. His actual performance ratios from use in 7 herds show 102 ratio for yearling and weaning along with 106 for marbling. His progeny demonstrate extra length and excellent rib and capacity. Dispositions have been very good. We have only had one cow that needed to be culled due to temperament after calving. If you are looking for sure thing calving ease and exceptional daughters with a classic pedigree, you might want to give him a try.

Best Box Cross 291 - Reg# 17438354

We have never used a bull that has had a more positive impact on our herd than Box Cross's sire LAR Alliance 64L. We have used numerous sons over the years and many of our top cows have been 64L daughters. Box Cross's dam was a Pathfinder donor dam that weaned off 9 calves for us with a 105 weaning ratio. She was my favorite cow at the ranch. We sold Box Cross to Ash Coulee Ranch as a yearling. Scott used him on heifers and cows with great success. Many of his sons were sale toppers and Scott says he still has customers asking if they could get more Box Cross sons. We didn't start using Box Cross until we started to see daughters producing for Ash Coulee. Box Cross calves are small at birth, but they still have excellent calf vigor and they catch up to their higher birth contemporaries by weaning. Box Cross will reduce frame without a big decrease in performance. The daughters are fertile and productive. Box Cross daughters are the smallest cows in our herd, with excellent udder structure with strong attachments and small teats. They are fertile and easy cattle to be around.

Coleman Donna 386 is the dam of Winchester

N Bar Emulation EXT is the sire of Winchester

CALVING*EASE BULLS

FOR YOUR NEXT HEIFER PROJECT!

Wolverine

SAT Wolverine 916 • Reg #: 19544206 • The Wolverine progeny are moderate, stout, good footed, loaded with breed character, and have plenty of substance for a bull with his level of calving ease. His high volume, easy fleshing Pathfinder dam records a BW ratio of 5/98 and a WW ratio of 5/105. Wolverine has become a go to for breeding virgin heifers nationwide as he has ascended to near the top of Select Sires sales the past two years.

Contact Select Sires or Talkington Angus Ranch for semen.

Klondike

Montana Klondike • Reg #: 20412812 • Klondike was our selection at the 2023 Montana Ranch sale. He is stout made with an impressive hip, excellent hoof structure, and a real herd sire look in a moderate package. He will be an important part of our heifer breeding going forward in our herd and in custom AI projects. His sire, Logo 8148, is an outcross source of low birthweight and high growth genetics. His dam, Coleman Donna 505, is powerfully built, yet feminine with a picture-perfect udder.

Contact Talkington Angus Ranch or Montana Ranch for semen.

E&B Essential

E&B Essential • Reg #: 20128935 • Essential possesses incredible structure and design and we appreciate his foot quality and mobility. He is a balanced trait sire fortified by a proven cow family that we expect to add fleshing ability, improve docility, and longevity. His standout dam is admired for her femininity, structural integrity, udder quality, and exceptional feet and legs. She is also the dam of the Accelerated Genetics sire E&B New Addition, who has been a perennial sales leader and has left beautiful, moderate framed daughters with exceptional udder quality who wean big calves across the US and South America. We feel Essential has the potential to be one of the top maternal sons of the extremely popular Growth Fund.

Contact ST Genetics or Talkington Angus Ranch for semen.

SEMEN available!

Contact **STROMMEN RANCH**

BRUIN TORQUE 5261

AAA #: 18248293 - There are three things Torque does better than any bull we have ever used - he adds body length, improves disposition and he stands on a tremendous foot. He works great on those big-bodied, easy-fleshing females that need spine length and extension up front. He improves disposition and foot quality, all while maintaining maternal function and power. His sons consistently sell at the top of our sales and we truly believe the best is yet to come with the 60+ Torque daughters we've retained in our herd.

SAV EASY STREET 2289

AAA #: 20473600 - We acquired SAV Easy Street 2289 with our friends at Select Sires Argentina & Juan Debernardi-Carne. We thought he was the true highlight calving ease bull of the 2023 Schaff Angus Valley sale.

Easy Street's beautifully uddered President dam has a birth ratio of 8@87. His maternal granddam has a birth ratio of 10@93 and his great granddam has a birth ratio of 10@95. His second and third dams both produced beyond 12 years of age, proving not only their fertility, but their longevity, as well. This makes us very confident in Easy Street's potential to be a long-term calving-ease bull that will leave behind beautiful, productive, long-lasting females.

We expect this gentle-disposition bull to make beautiful females in a calving-ease package.

For semen on these bulls or to book custom AI services, contact us!

BADLANDS ANGUS ALLIANCE BULL & BRED FEMALE SALE

December 4, 2024 • Stockmen's West • Dickinson, ND • 12 p.m. MST

60 COMING 2-YEAR-OLD ANGUS BULLS

700 COMMERCIAL BRED HEIFERS FROM OUR CUSTOMERS

The Talkington, Best and Strommen herds are each backed by a similar maternally-oriented, balanced-trait breeding philosophy. We each place heavy emphasis on fertile, efficient, easy fleshing cows, which is why our genetics fit well together for discriminating cattlemen who desire cattle backed by generations of maternal excellence – phenotypically appealing females with good feet, great udders and outstanding docility.

We invite you to join us in Dickinson on Jan. 25, 2024 for the inaugural Badlands Angus Alliance Replacement Heifer Calf Special, featuring 255 replacement-quality heifer calves from our customers and again on Dec. 4, 2024, for the Badlands Angus Alliance Bull & Bred Female Sale featuring elite, source- and genetic-verified bred females from our customers, as well as stout, rugged, coming 2-year-old bulls from our respective programs.
